

Minimum Viable Product (MVP)

MVP by Asteway Kebede

- **Goal:** Where is the best place to open a yoga studio that will be convenient for employees from the city to use to relieve stress.
- **Process:** Perform EDA to find out which overall stations are the busiest. Then filter that down to look at weekdays and particularly a few hours before and a few hours after the typical 8am to 5pm work hours.

- **Preliminary visualization:** The visualization shows that there are significant decrease in foot traffic during weekends.

- **Preliminary conclusions:** We will focus on weekdays and dig more into the hours by day to find any patterns in foot traffic.
